

SOFTENGINE SAP BUSINESS ONE PRODUCT

SOFTENGINE WAREHOUSE SOLUTION (WMS+)

Softengine Warehouse Management Solution+ Operates on Handheld Enabled Touch Screens. This Customized Solution Integrates Warehouse Inventory, Production Processors in Realtime to SAP Business One.

FUNCTIONS

PICKING AND PACKING INVENTORY

- Easily delegate pick lists and allow the team to scan quantities into packages ready for dispatch or into staging areas for production
- Softengine Warehouse Solution presents the user which bin location the item is located, designated batch number assigned to the order, and the quantities required
- “To Pick” counters decrement every time the inventory unit is scanned to ensure the correct batch is picked reducing expiration date errors

RECEIVING OF GOODS INWARDS

Using the Handheld Device Users

- See what documents are due to arrive, record good receipts in SAP Business One from these base documents
- Print barcode labels recording box quantities, lot numbers, and expiration dates to affix to items in real time.
- Print quality control documentation directly from the device

MAINTAINING RECEIPTS OF PRODUCED ITEMS

Users Can Issue Production Receipts Directly From the Handheld Device

- Barcode labels can be printed in real time recording box quantities, lot numbers, and expiration dates to affix to newly produced items
- Aiding in the storage, tracking, and retrieval of produced inventory items

BARCODE SCANNER

Apply lot-controlled quantities of inventory to SAP Business One documents and transactions

- Issuing inventory to a Delivery Note from Base Sales Documents
- Issuing received inventory to a Goods Received PO from Base Purchasing Documents
- Issuing inventory to A/R Invoices on a Delivery Route
- Issuing inventory to Pick Lists
- Issuing inventory to Production Orders
- Issuing inventory to Inventory Transfers / Bin Locations
- Issuing inventory to Counting Orders
