EXECUTIVE SUMMARY

Real-Time Visibility for a More Efficient Operation

Jaunty Inc. is a wholesale rug company that has used SAP Business One since 2019 across Sales, Purchasing, Inventory Control, and Accounting.

Before SAP Business One, Jaunty relied on AccountEdge and Excel for reporting. The company wanted better visibility across different segments of its operations, more streamlined reporting, access to live data, and fewer errors. Its goals included saving time, reducing errors, accelerating data entry, and improving reporting.

Today, Jaunty has live, up-to-date inventory and financial information, can provide customers with accurate stock status, and can better project inventory requirements when placing orders with vendors. The company reports 20%-time savings, 10% fewer errors, 30% faster reporting, and a 10% improvement in inventory accuracy.

KEY FOCUS AREAS

- Live inventory and financial information across operations
- Faster, more streamlined reporting
- Accurate stock status and stronger inventory planning
- Greater efficiency and capacity without adding staff

SOLUTIONS IMPLEMENTED

- SAP Business One

We have the same number of employees as when we started with SAP. However, we are able to do a lot more with the same staff.

— Mike Navid, President | Jaunty, Inc.

SOLUTIONS IMPLEMENTED

SAP Business One

ERP supporting Sales, Purchasing, Inventory Control, and Accounting.

Integrated Business Visibility

Live inventory and financial information supporting reporting, customer stock inquiries, and inventory planning.

THE CHALLENGE

Limited Visibility Across the Business

Before SAP Business One, Jaunty used AccountEdge along with Excel for reporting. The company wanted greater visibility across different segments of its operations and a more streamlined approach to accessing and reporting business information.

- Limited visibility across different areas of operations
- Reporting relied on Excel alongside the existing accounting system
- Need for live, up-to-date business information
- Primary goals: save time, reduce errors, accelerate data entry, and improve reporting

WHY SAP AND SOFTENGINE

A Powerful ERP Backed by Qualified Expertise

Jaunty researched and considered multiple ERP systems before selecting SAP Business One. After evaluating its options, the company chose SAP Business One to support Sales, Purchasing, Inventory Control, and Accounting.

Since implementing the solution, Jaunty says it is very satisfied with its decision. The company describes SAP Business One as a powerful ERP and Softengine's team as highly qualified.

Jaunty recommends both SAP Business One and Softengine and identifies Softengine as one of the more qualified companies to work with for SAP Business One.

ERP Expertise

A qualified Softengine team supporting Jaunty's SAP Business One environment.

Business-Wide Support

SAP Business One connects Sales, Purchasing, Inventory Control, and Accounting.

Customer Confidence

After considering multiple ERP systems, Jaunty remains very satisfied with its decision to choose SAP Business One and Softengine.

SAP Business One is a very powerful ERP. Softengine's team are very qualified.

— Mike Navid, President | Jaunty, Inc.

BUSINESS RESULTS

Five Areas of Meaningful Impact

20% Time Savings

Jaunty reports a 20%-time savings since implementing SAP Business One. Day-to-day operations are significantly more efficient, helping the company accomplish more with the same number of employees it had when it started with SAP.

30% Faster Reporting

Reporting is now 30% faster. Jaunty has access to live, up-to-date inventory and financial information, addressing its original goal of creating more streamlined reporting and better visibility across its operations.

10% Improved Inventory Accuracy

Jaunty reports a 10% improvement in inventory accuracy. The company can provide customers with accurate stock status while gaining better visibility into inventory throughout the sales process.

10% Fewer Errors

Jaunty reports 10% fewer errors since implementing SAP Business One, directly addressing one of the company's primary objectives for its ERP implementation.

Greater Sales Visibility & Operational Capacity

The sales process has benefited the most from SAP Business One. Jaunty now has visibility across the entire flow from Sales Order to Delivery to A/R Invoice, while Pick and Pack visibility has been "priceless."

The company can also project inventory needs and place vendor orders accordingly. Jaunty has maintained the same number of employees it had when it started with SAP while being able to accomplish significantly more with the same staff.

Ready to Modernize Your Operations?

Whether you're looking to improve inventory visibility, accelerate reporting, reduce errors, or help your existing team accomplish more, Softengine helps growing businesses get more value from their ERP investment.

I had researched and considered multiple ERP systems in addition to SAP Business One. I am very satisfied with our decision to choose SAP Business One and believe Softengine is one of the more qualified companies to work with.

— Mike Navid, President | Jaunty, Inc.
