WEB

The Next Generation SAP Business One Portal Solution

Softengine Web is a modern, web-based portal platform designed for mid-sized and growing enterprises running SAP Business One. It empowers manufacturers, distributors, and service providers to digitize, automate, and extend their B2B and employee operations. With real-time SAP integration, AI-driven extensibility, and a persona-based experience,

Key Benefits

- **Real-Time SAP Integration:** Native, bi-directional API connectivity ensures instant data sync—no manual updates or duplicate entry.
- **Any Device, Anywhere:** 100% web-based, mobile responsive, and touch-optimized for seamless access on any browser or device.
- **Cost-Effective Licensing:** No need for full SAP licenses for portal users; flexible subscriptions with indirect license costs included as needed.
- **Persona-Based Experience:** Role-based dashboards, menus, and workflows tailored for B2B clients, sales, production, and service teams.
- **AI-Driven Extensibility:** Built-in AI Copilot and in-app editor enable custom logic, automations, and data processing without deep coding.
- **Self-Service & Transparency:** Empower users to act, track, and transact in real time, reducing administrative workload and boosting satisfaction.
- **Secure & Role-Based:** Granular access controls, user-specific navigation, and robust security built in.

Supported Business Processes

- **B2B Sales & Order Management:** Self-service order pad, reorders, returns, group buying, and payment.
- **Production & Manufacturing:** Shift planning, routing, scheduling, batch management, and real-time reporting.
- **Field Service:** Warranty tracking, ticket management, engineer scheduling, and status updates.
- **Inventory & Catalog Management:** Visual product catalog, stock allocation, and automated notifications.
- **Internal & External Communication:** Message delivery, document sharing, and workflow approvals.

Supported KPIs

- **Order Cycle Time:** Track time from order placement to fulfillment.
- **Inventory Accuracy:** Real-time stock levels, batch/lot tracking.
- **Production Throughput:** Monitor shift output, bottlenecks, and downtime.
- **Customer Satisfaction:** Portal usage stats, self-service adoption, and feedback.
- **Service Response Time:** Time to ticket resolution and SLA compliance.
- **Cash Flow:** Real-time invoicing and payment tracking via portal.

Softengine Web Features	
Native SAP B1 Integration	Real-time, bi-directional API sync—instant updates, no duplicate entry.
AI Copilot & Editor	In-app editor with AI-driven automation, version control, and real-time preview.
Persona-Based Portals	Dedicated UIs for B2B clients and employees; role-based menus and dashboards.
End-to-End Workflow	Sales, production, scheduling, service, and logistics—all in one platform.
Touch & Scan Ready	Optimized for touch screens, barcode scanning, and mobile workflows.
Open Extensibility	Modern JS/UI5 stack, open-sourced views, API connectivity to 3rd-party and AI services.
In-App Version Control	Real-time preview and versioning of customizations and logic changes.
Dashboards & Analytics	Visual KPIs, charts, and boards for actionable insights.
B2B Sales Portal	24/7 order placement, real-time inventory/pricing, order tracking, and document downloads.
Production Terminal	Mobile order processing, batch receipts, and shift management for production teams.
Production Routing/Scheduling	Calendar-based scheduling, sub-status tracking, and Kanban-style boards.
Field Service Management	Service ticket creation, assignment, and scheduling with SAP warranty integration.
Product Catalog	Visual catalog with categories, images, prices, and stock for employees and customers.
Global Sales	Place/manage orders globally for sales teams and reps.
Recipe Manager	Store/manage multiple recipes (BOMs), supplier substitutions, and yield management.
Message Delivery System	Broadcast messages to employees or customers via the portal.
Admin Console	Central hub for configuration: roles, rules, UI, security, workflow, and logic.
Analytics & Reports Builder	Build dashboards, publish reports, and leverage SAP/Crystal Reports.
Label & Print Configuration	Design, trigger, and manage labels and print jobs.
